Re: Public Records Act Request PR056

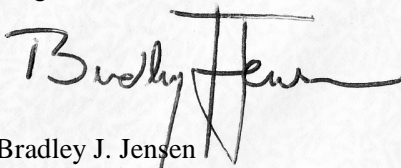

Dear Dr. Anderson,

Thank you sir. Upon initial inspection of the attachment it appears all the Chameleon data fields were provided as requested and the absence of Outcomes and Outcome Dates for some animals impounded during the month of November 2008 indicate that date criteria for this query was done as requested. However, the format of the file you have provided (PDF) was not as I had requested, which was to provide animal records in either a tab-separated text file or an MS Excel file (see "Form of Information Requested").

I will compensate for the processing fee of \$15 upon receipt of your invoice with the mutual understanding that you have not provided these records in either of the file formats requested and with the further understanding that Chameleon CMMS/Crystal Reports software allows users to query records and produce reports in file formats other than PDF, namely MS Excel and tab-separated text.

In order to completely satisfy the request for animal records as described in "Public Records Act Request: PR056" you may wish to re-produce them in either an MS Excel worksheet or a tab-separated text file as originally requested and send again. If you choose not to do this, I only ask that you please provide an explanation as to why you were unable or unwilling to provide this information in either of the file formats requested so that it can be documented.

Regards,

Bradley J. Jensen
