Public Records Act Request: PR061

Dear Ms. Learned,

In your response dated January 27, 2009 to my request for Chameleon records you stated that your IT division would be required to create a specific SQL query for the information I requested and then export that information into Excel. Estimated time to create this "record" would be two (2) hours at \$32.00 per hour for a total cost of \$64.00.

The information I requested was for records of all animal impounds from January 2007 through December 2008 and that each animal record contain **at least** the Chameleon data fields I have listed for you.

Have any SQL queries been previously created and used to extract animal records from Chameleon that would result in more data fields than necessary but still contain at a minimum, the data fields I listed? And if that SQL query was for a period of time other than what I requested, could the dates "from and to" be changed to satisfy the period of time I requested?

This would substantially reduce the length of time your IT division needs to satisfy my request for Chameleon records.

Regards,
