Denise,

Please query the records with both DOB and age (Years and Months) included. Although most of your intakes may not have a value for DOB I can assure you, the empty DOB data fields will not be just wasted space ;-) I need both to prove a point.

It might help if you query the 2007 impounds into one file and then query the 2008-2009YTD impounds in a second file. The query results should give you only about 30-35K records in each file. Much easier to handle and will result in smaller files.

Thank you,

Brad Jensen

Brad - We don't have DOB's on 99.9% of our intakes, there's absolutely no way for us to know that info. Our ages are based on staff's and vet's visuals. That's as good as it's going to get for impounds by age. It would be a waste of space to include DOB in the query. the other fields are already there. I will rerun the query. Of course you know, this is going to be a monstrous file.

Dear Denise Haynes,

Please see the attached public records request.

Would you please re-run that one query you now have to include all animal impounds from JANUARY 2007 through FEBRUARY 2009?

And please use criteria for impound dates only and none for outcome date. This will allow us to retrieve the correct number of animal impound records. Listed below are the Chameleon data fields I'll be needing. Please note, I've included the data field DOB (Date of Birth)

to this list so that I can get a slightly better read on impounds by age. I'd still like you to include the AGE fields though (Years and Months) because of a technical issue with Chameleon I'm trying to sort out.

INTAKE DATE  
INTAKE TYPE  
JURISDICTION  
INTAKE SUBTYPE  
ANIMAL ID  
SPECIES  
AGE YRS  
AGE MOS  
DOB  
SEX  
PRIMARY BREED  
PRIMARY COLOR  
INTAKE COND  
OUTCOME TYPE  
OUTCOME SUBTYPE  
OUTCOME DATE

Thank you.

Regards,
