Cc: Michael Mina <mmina@ph.lacounty.gov>

Brad,

Our program was not involved in testing any cats for murine typhus, and we were not informed about the incident you are describing. Thus, we do not have any records that are related to your request. I suspect that the Vector Management Program with Environmental Health may have been involved. Their phone number is 626-430-5450. I suggest you contact them to see if they were the ones that collected the samples, and if so, what information they would need to find such records.

Karen
