To: Guy Shaw <ShawG@co.kern.ca.us>

Thank you Guy but two of the Chameleon data fields I need are missing in the worksheet provided:

1. Intake_Type which tells me if an impounded animal was a public/owner surrender, transferred in from the SPCA or brought in by an ACO from Arvin, Delano, Bakersfield City, etc...
2. Intake_Subtype which tells me if an impounded animal was a stray, adoption return, quarantine, surrendered, etc...

Species is what type of animal was impounded (cat, dog, bird, livestock, etc...) I think Chameleon data field for species is named "Animal_Type". You provided this information in the worksheet.

Please re-run the query and include the missing data fields (intake_type, intake_subtype).

Regards,

Brad Jensen
